Okay, I will let the lab know. We are at 32 to 36 inches.

**** External Email ****

No, we should run SPLP if we are not going to dig deeper. How deep are we?

Gary/Paige,

Looks like we failed in EAS07, EAS08, and FJD04-07 at final depth. EAS08 has the highest level PCBs we have seen at final depth, the grid is half bedrock and half soil (on the street side) of the grid. The geotextile is already in place for FJD04-07, partially in place for EAS07, and we'll make sure to let Don know to place geotextile in EAS08.

Gary,

We have two SPLP samples (EAS07 and FJD04-07) waiting at the lab. Since these two grids failed at final depth, we should not run the SPLP testing correct?
